...advancing frontiers of knowledge in Technology Management

A Publication of National Centre for Technology Management

From the DG/CEO's Desk

Engr. Prof. Okechukwu Ukwuoma

DG/CEO, NACETEM

Advances in science and technology are being recorded at a dizzying speed in our world today, and with the pivotal role of

technology in development, there is an increasing need for technology management. Technology management entails planning, development, use and diffusion of technology as well as its application to the industry and its impacts on the social, economic, cultural, political and geographical environment of a nation. Any firm, industry or nation that places a premium on technology management sets itself up for rapid growth and development. With our nation's current drive to be a major player in the global economy due to its human and natural endowments, as well as the country's commitment to the 2030 Agenda for Sustainable Development, the

need for an aggressive approach towards science and technology-driven development is more urgent than before. This urgency is what makes NACETEM critical to Nigeria's development through science and technology. To this end, NACETEM has developed several cutting-edge programmes anchored on the tripod of capacity building, policy research and consultancy in the areas of Science, Technology and Innovation (STI) management. This Newsletter avails you the opportunity to be acquainted with what we do and how we do what we do. It's a voyage into our activities in the first half of 2021 and a glimpse into what is expected in the remaining half of the year.

Nigeria can leverage international partnership opportunities to develop, says minister

Mr Mohammed Abdullahi, Minister of State for Science and Technology, says Nigeria has what it takes to advance and connect with opportunities offered by international partnerships to enhance its development as a nation.

Minister said this in a keynote address he delivered virtually from Abuja, at the two-day national workshop on science diplomacy, organised by the National Centre for Technology Management (NACETEM).

However, he said, before this could be achieved, a lot more needed to be done, as he highlighted the place of Science, Technology and Innovation (STI) and the role of international relations in Nigeria's

Hon. Muhammed H. Abdullahi

Minister of State for Science and Tech.

sustainable development. The minister said that in the current global village, where every nation is bound to operate, knowledge remained the greatest capital driven by science, technology and

innovation.

"Every nation that is serious and focused on developing this capital must invest in science, technology and innovation development at home.

"Connecting home-grown advancements in STI to opportunities offered by global partnerships must also be driven by strategic international diplomatic relations.

"Joining these dots is most essential for sustainable development in the current era," Abdullahi said...

Technical, Vocational Education, Important Factor for Economic Development – NACETEM

The National Centre for Technology Management (NACETEM) has identified Technical and Vocational Education and Training as an important factor in Nigeria's economic development.

Stakeholders who spoke at a two-day workshop tagged: Redirecting Technical and Vocational Education Training (TVET) for local content capacity and wealth creation in Nigeria held at Ibadan Business School (IBS), in Ibadan viewed TVET as a tool

to enhance productivity and reduce poverty in Nigeria.

NACETEM is an agency of the Federal Ministry of Science and Technology saddled with the responsibility of providing critical knowledge support in the area of STI management through policy research, capacity building, science, technology and innovation advisory services, a databank of

Specialised skilled labour force, professionals a necessity – NACETEM

The Director General, National Centre for Technology Management, Prof. Ukwuoma Okechukwu, has said specialised skilled labour force and professionals are a necessity for countries to overcome challenges of the destructive creations emerging from new technologies.

He stated this at a sensitisation workshop on the survey of scientists and engineers in research institutes across Nigeria held on Thursday.

According to him, the rate at which technological innovations are being developed and applied disrupts catch up efforts of developing countries and widens the inequality gap.

He said a combination of science and technology, and skilled labour force was key factor for national competitiveness, economic development and environmental wellbeing

Okechukwu also stated that the COVID-19 pandemic had shown that countries without the required technological capabilities were bound to suffer either from the life threatening side of the disease or the impacts of its economic devastations....

Wabote said that since TVET has not been given adequate attention in Nigeria, the quest to acquire university or tertiary education has overwhelmed many Nigerian youths to the detriment of technical and vocational education.

"In many instances, it is observed that some of our university or tertiary institutions lack intensive practical/hands-on training, and the curricula are largely not in alignment with industry/organisational needs

and the rapidly changing global technological development and smart innovations...

FG's 100 Million Job Drive: NACETEM Moves to Develop Youth Capacity Through Tech Vocational Education Training

The Federal Ministry of Science and Technology, through the National Centre for Technology Management (NACETEM) on Tuesday 20th April, 2021, expressed its determination using its mandate and expertise to up government's drive to create 100 million jobs through Technical and Vocational Education Training (TVET).

The Director-General/Chief Executive Officer (CEO) of NACETEM, Prof. Okechukwu Ukwuoma, while welcoming delegates to the workshop organized by NACETEM, South-west office, Lagos, said: This workshop could not have come at a better time than now when the current administration's objective for job and wealth creation is at the all-time high.

He acknowledged that the choice of this workshop is to directly contribute to the objective of wealth creation using science, technology and innovation as a pilot, adding specifically, that the workshop will be focusing on TVET to build local content capacity and create sustainable wealth.

Engr. Ukwuoma, said: "It needs to be

Director-General/Chief Executive Officer (CEO) of NACETEM, Prof. Okechukwu Ukwuoma

stressed that the primary objective of TVET is to assist the federal and state education authorities in their effort to revitalize, reform and expand the provision of skills, vocations, science and technology to meet the nation's present and future socio-economic needs.

"Technical and Vocational Education (TVET) is that aspect of education which leads to the acquisition of practical and applied skills as well as basic scientific knowledge. NACETEM considers it imperative to beam its searchlight on technical and vocational

education with a view to equipping the country's teeming youths with the necessary skills that can help them to overcome the challenges of unemployment and/or joblessness as the case may be."

.He reiterated that NACETEM is an agency of the Federal Ministry of Science and Technology saddled with the responsibility of providing critical knowledge support in the area of STI management through policy research, capacity building, science, technology and innovation advisory services, databank of STI resources, among others.

According to him, the workshop should be seen within the prism of reaching out to the teeming public, particularly in capacity building and advisory services, stressing that the agency is hopeful that stakeholders and members of the public at the auspicious event will contribute significantly to the overall success of the workshop.

NACETEM Admits new Students into its Postgraduate Diploma in Technology Management Programme

The National Centre for Technology Management (NACETEM), an Agency of the Federal Ministry of Science and Technology, admits over 100 students into its Postgraduate Diploma in Technology Management programme for the 2020/2021 academic session on Saturday, 30/01/2021.

Coordinator, Mrs MaryAnn Onyejekwe, he encouraged the students to operate with an open mind and take full advantage of the opportunities which the programme offers them.

In his words "I want to encourage you to maximize the array of opportunities inherent in this programme. It is an eye-opener to otherwise neglected areas of immense opportunities in our society. To this end, be open-minded as you go through the programme"

To allay the fear of disruption in the event of a likely lockdown because of the second wave in the country, the Postgraduate Diploma Coordinator of the Lagos Study Centre, Dr Mirabel Omoruyi said the Agency has put in place a very effective and efficient virtual technology that will allow the programme run unimpeded..

Innovation in all sectors is crucial for economic diversification - Minister

The Minister of State for Science and Technology, Dr Mohammed Abdullahi, says the only option for Nigeria's economic diversification to succeed is through the application of cutting edge innovations in all sectors of the economy.

Minister of State for Science and Technology, Mohammed Abdullahi

Abdullahi made his view known at the opening ceremony of a two-day virtual Government-Industry-Academia (GIA) Linkage Workshop organised by the National Centre for Technology Management (NACETEM), on Wednesday in Abuja.

He stressed that to drive home President Muhammadu Buhari's quest for economic diversification, innovation should be backed by research in agriculture, biotechnology, health, nano technology, as well as the other sectors

<https://nannews.ng/innovation-in-all-sectors-is-crucial-for-economic-diversification-minister/>

The Postgraduate Diploma in Technology Management programme is designed to deepen the understanding of participants on how to deploy appropriate technology to solving societal problems which will ultimately bring about sustainable development.

CityMirrorNews reports that the programme, which has been running for over two decades, is one of the several cutting edge capacity building activities of NACETEM.

At the orientation programme for the newly admitted students on Saturday, the Director-General/Chief Executive Officer, Engineer Professor Okechukwu Ukwuoma, ably represented by the NACETEM Southwest

NACETEM Unveils Its Ultra Modern Lodging And Relaxation Facilities

The National Centre for Technology Management (NACETEM), an Agency of the Federal Ministry of Science and Technology, with its Headquarters sited within the Obafemi Awolowo University, Ile-Ife, today, Thursday, 1st April, 2021 opens its ultra-modern lodging and relaxation facilities to the public.

The facilities, which comprise 20 Guest Challets, Lounge and 500-Seater Auditorium, are constructed to make

learning conducive for the participants of the Agency's training programmes.

NACETEM trains middle-to-high level manpower in science, technology and innovation management. This is done through seminars/webinars, short-term training courses, conferences and workshops. Since inception, the Agency has trained over 5000 Technology Managers who ply their trades in different sectors of the economy.

At the unveiling ceremony, the DG/CEO,

Engineer Professor Okechukwu Ukwuoma, represented by the Head, Human Resource Department, Mr Akin Olawale said the

facilities are there to make life easy for participants at the Agency's training programmes.

With these state-of-the-art facilities, NACETEM has again made a bold statement

to the world as an Agency poised to change the way knowledge is imparted as a conducive environment is a critical factor in human capacity building.
